

RETURN GOODS POLICY

Vibra Finish equipment- Vibra Hone- is warranted against defects in material and workmanship. This warranty applies only to equipment that has been used in accordance to the manufacturers' instructions. Any equipment being requested for return must be requested and approved in writing.

All Vibra Hone equipment sales are considered final unless otherwise described by a Vibra Finish representative. Equipment, if return is acceptable, must be clean, dry, and free of debris and in original packaging unused.

All returns must have a return goods number (RGA) supplied by Vibra Finish, marked on the bill of lading. Returns not bearing this number will not be accepted by our receiving department.

All returned equipment is subject to a minimum 25% inspection and restocking charge.

Transportation charges must be prepaid or third party billing. Collect shipments will not be accepted.

Special designed equipment or special orders will not be allowed for returns.

In order to control costs we must adhere to this policy. Please plan your equipment purchases carefully as most of our returns are the result of improper selection. Vibra Finish will be happy to aid in the selection process by sample testing parts in our laboratory, free of charge.

Thank you for your continued business and cooperation in this matter.

THE VIBRA FINISH COMPANY
